Introduction

We are here to present to you an amazingly engineered NFT that are bond with the real Countries, States, Cities, and Cities tied up with our very own **\$GREY** Currency and to build an amazing ecosystem where Grey Owners can easily trade, earn and make some profit.

New Comers

The Grey Land is a technology built in **BEP-721** just like others. If this is your first time hearing **BEP-721** this is a technology where you can be able to hold NFT's and be able to view your own digital assets "Grey Land" and have a potential to grow in the future. As right now that our technology is growing and a massive adoption of NFT space we would love to run a project that will take over and have a great part on NFT.

In order to understand what crypto is you have to understand what Bitcoin is first because Bitcoin is a digital currency which operates free of any central control or the oversight of banks or governments. Instead it relies on peer-to-peer software and cryptography. A public ledger records all bitcoin transactions and copies are held on servers around the world and that is how Crypto started.

And right now as we begin Grey Land is now combining the power of Decentralized Finance and NFT at one to be able to create a wonderful NFTs and earning system where people could grow their assets.

Grey Concept

We wanted to show you the thrilling part of Grey Land NFTs.

Grey Land Assets has been formed with real economic utilities and extreme benefits. Compared to other NFT projects Grey Land is a real geographic location where you can be able to browse the globe and view; countries, states, and cities.

The next one is Grey Land Civilians. We will be having a weekly event where roles will be given and need to play the randomly assigned role to you. All the details regarding the roles will be explained in the Grey Land Competition.

We wanted to create and bond an NFT Ecosystem that is based on the geographic location of the earth for a reason that we wanted to start a Defi NFT to be able to make a fair distribution to the future Grey Land Civilians(That's you) to have give a big opportunity and freedom.

We wanted to give you a warm Welcome here at Grey Land!

Earning System

Grey Land is mapped with earth's geographic locations built in Binance Smart Chain (BSC) Network.

Grey Land is a kind of NFT that combines with a vanguard technology on BEP-721 with BEP-20 Tokens to create a unique and wrapped, insulated economy that will benefit the land owners.

There will be a percentage for each transaction on Lands or \$GREY Tokens and will be stored as a liquidity. Through the power of Binance Smart Chain with extremely low fees and ecosystem that are growing extremely fast Grey Land would love to be part of Binance Smart Chain Ecosystem (BSC) Network.

Other ecosystems like Ethereum have really high gas fees so we don't want to make our future civilians to be frustrated in terms of buying and selling lands and you can do it infinitely without thinking about high gas fees.

Land NFTs

All geographic locations of land assets are based on the real world and can surely be verified with ownership and can be seen in the issued receipts on BEP-721. Initially we will release countries and states by minting on our website and can be able to view your land on our website. Once we complete the mint all the Countries will go next by Regions and followed by States. Other than that can be also seen different NFTs on the marketplace that can be able to purchase if you owned a land. Every region, state, or province that is bought under your country you will receive a \$GREY token as a reward and the much higher land assets you have the more rewards you receive.

Grey Land NFTs

Tokenomics When you buy a Land, 9% of the value of transaction NFT will be distributed in some ways:
3% is distributed to the liquidity pool: It will make the Grey Land stronger if its pump price gets soared high and it adds up the liquidity from time to time. 2% is distributed as our marketing. We know that marketing plays a very big role in this type of project/business so we decided to focus on the marketing side to be able to promote easily and make the Grey Land Stronger. 4% is distributed to the land owners who own land in the form of distribution rewards. The rewards are split evenly 50% each time to the

highest valuable land. During the MINTING phase of lands, as of the moment there will be no owners of the land, **96%-98%** of the sale price will be distributed to Liquidity with no developer fees. During the sale of New NFT Countries(You will be the very first owner), **95%** will go to the liquidity and then **5%** will be directed to the marketing.

While everyone is busy minting their own nft this will continuously be done until we finish the minting phase of countries and so on.

\$GREY Token

The economy of GREY LANDS has its own currency called: **\$GREY Tokens** is the one who makes the Grey Land much stronger. This will be the number one asset that the GREY LAND have by owning a digital currency. You can be able to buy and sell via any other decentralized exchanges like pancakeswap and many more

Token Economics

GREY Tokens are BEP-20 Tokens and any distribution rewards paid out on the game transaction will be transacted on its own platform as we use the other services we take advantage of these platforms and possibly to create another project under GREY Lands. One thing that makes the ecosystem different is you can either choose if you want to sell via BNB, USDT, or \$GREY Tokens.

The \$GREY Token Distribution is listed below: Total Supply: **1,000,000,000** (One Billion Token Supply)
4% will be the team's holding from the liquidity pool of our tokens.

- 4% will be the bounties from the communities.
- 4% will be from the marketing team wallet.
- 8% will be burned to a non accessible wallet.
- 70% will be available via-DEX under BSC Network
- 10% will go to our development projects.

Grey Land Marketplace

The idea of our very own marketplace to have an extremely good UI/UX we also wanted to have its own unique function called “The Civilians Marketplace” where they can be able to sell their private assets under the marketplace and have a unique business model system and earn more profit.

Maintenance

Compared to other NFT we don't have this type of maintenance function but this will be built for the other currency we will be having called the vGREY Tokens and this can be earned via Bounty Quest, Weekly Event, and Community Competition. The vGrey token will be used as rewards on these events and will be having very cool projects in Q3.Grey Land Competition

This event will only happen once a week to make the NFT Owners more lively! Rules:

There will be 3 roles for this weekly event and below we have the following:

The Civilians:

Can be able to view their houses or any cities but they need to be always active to be able to protect the rewards you have.

The Detective:

The detective plays a very good role because the detective will be able to earn money by solving and catching who the thief is. They will be paid by the Civilians and if they catch the thief they can recover the \$GREY Token Rewards that have been stolen.

The Thief:

The thief has the chance to rob any individual in its own city if the week is done and they didn't figure out who the thief and the thief can keep the \$GREY Tokens but if the thief is caught he will be put in jail.

The Jail:

Thieves will be banned for receiving rewards for 1 week and after the week will be free and continuously receive the rewards.

We built this kind of idea because in any other economy there will always be unfortunate and fortunate. The team believes in luck and bad luck so as we make this idea this will be a really thrilling moment for Land Owners.

Grey Land's Bounty Weekly Hunt

There will be a riddle and present on the Weekly Hunt all landowners will receive and will give clues for the coordinates of the location of the Bounty.

Rewards

Ways you can earn on GREY LANDS!

- 1. Hold your Land Asset and earn rewards by the earning distribution rewards from each buy/sell/transfer transaction. The bigger the land you own the more rewards you can get that will be traded under your land.**
- 2. Buy, Sell, and Trading your Land Assets. As Land Assets naturally increase in value due to scarcity, this approach may be of more interest to you. You can also list it on our marketplace and place the value you want can be also a bidding system.**
- 3. You can also earn by holding \$GREY Tokens based on our fixed taxations and balance token economics a redistribution of \$GREY Tokens as rewards via- buying, selling, and transferring tokens.**
- 4. Lastly the plan is infinite and the idea is unstoppable. We will build Grey Civilians and will have its own Country Pass to be able to visit and make money on a growing economy in different countries.**

Claiming Rewards You will be able to claim your rewards through the website and connect your wallet to it. Once you connect you can be able to view your Land Assets as well.

How To Earn?

1. Countries, Cities, States are earning possibly if they are bought on under those land assets.

2. You can claim the rewards by clicking on the sidebar of the application.

3. You can make money by buying and selling your nft on the marketplace.

Frequently Asked Questions

What is Grey Land?

Grey Land is the first kind of, Virtual Land, NFT Platform that is on BEP-20 Network Tokens mirroring the Earth All countries, States, and Cities and can be only viewed in Grey Land with a currency of \$GREY Tokens be backed from it.

Claiming Rewards You will be able to claim your rewards through the website and connect your wallet to it. Once you connect you can be able to view your Land Assets as well.

How To Earn?

1. Countries, Cities, States are earning possibly if they are bought on under those land assets.
